

APPLICATION

The ENI-PO1024/768/2 control panel visualises operating states to the operator, enables the operator to input operating parameters, and archives specific operating parameters. The control panel can output the archived operating parameters to an export file format supported by e.g. MS Excel and written to a connected USB storage unit.

SPECIFICATION

TYP	ENI-PO1024/768/2
Rated input voltage	24 V _{DC} ref. EN-50155
Display	Type: TFT, 262k colours Size: 10,4" Display resolutions: 1024 x 768 pikseli
Operator controls	Capacitive touch screen display (with tamper-proof front glass)
Communication interfaces	CAN USB (for downloading archived parameter data to USB storage units)
Ambient operating temperature	-25°C ÷ +50°C (pow. 40% RH<60)
Size (L x W x H)	280 x 227 x 72,5 mm
